

## **Highly Anticipated, Astonishingly Realistic New No-Cost 3D Driving Simulator App “Euro Truck Driver” from Ovilex Soft Puts Users Behind the Wheel of a European Truck**

*Euro Truck Driver by Ovilex Soft features: 27 customizable trucks from across 7 European truck brands, a GPS map to trek through 20 cities in 11 countries, realistic weather conditions and day/night cycles, multiplayer mode, 6 camera views, lifelike engine sound effects, and more. The new no-cost app is available from the App Store and Google Play.*

Cupertino, CA ([PRWEB](#)) December 28, 2015 -- After months of development, Ovilex Soft announced today that it has released its highly anticipated new 3D driving simulator app Euro Truck Driver -- and the wait was well worth it, because the extreme detail, ultra-realism and overall creative and challenging gameplay experience is nothing short of astonishing.

Available at no-cost, Euro Truck Driver is a worthy addition to a growing line of Ovilex Soft’s previous 3D driving simulation apps, which include Bus Simulator 2015, Farmer Sim 2015, Train Driver 15, and several more available from both the App Store and Google Play.

The app features 27 distinct trucks with detailed interiors from across 7 European truck brands (both 4x2 and 6x4 axles). Once they select their rig, users climb behind the wheel and head out on the open road as they use the GPS map to trek through 20 cities in 11 countries, including Berlin, Rome, Paris, Madrid, Vienna and more.

If they wish, users can drive for fun as they steer, accelerate, brake and turn along various highways, country roads and mountain passes. As expected from the perfectionists at Ovilex Soft, the driving physics are remarkably lifelike, and the degree of precision and sensitivity will impress real-life truckers who know that life inside a truck cab is far different than in any other vehicle.

At the same time, users don’t have to worry about spending days learning how to avoid ending up in a ditch or careening into the side of a mountain, as the controls (tile, buttons or touch steering wheel) are easy to learn and operate. Or, users can launch the app’s career mode, and try to make money that they can spend on new trucks and upgrades. Users can also challenge their friends or join a convoy via multiplayer mode, or download the executable file and host their own multiplayer server.

Other Euro Truck Driver special features include:

- Realistic weather conditions, day/night cycles
- Multiple truck customization options, including: lights, frame covers, antennas, beacon lights, bull bars, roll bars, paint, wheels and more
- Lifelike engine sound effects
- An AI-based traffic system
- An integrated music player
- 6 different camera views
- Visual damage on trucks – from small dings to major dents

Plus, users can take photos of their Euro Truck Driver experience and upload them to the app’s website at [www.etdgame.com](http://www.etdgame.com), as well as request new trucks and features via [Ovilex Soft’s Facebook page](#).

“We have been developing Euro Truck Driver for quite a while, because our worldwide users expect us to deliver flawless driving simulator experience,” commented Marusac Alexandru of Ovilex Soft. “We’re thrilled to finally release the app, and are very inspired by the early reviews that have been completely positive. Users love the realism, the detail, the challenge, and of course, the fun!”

Euro Truck Driver, the new no-cost 3D European truck driving simulator app from Ovilex Soft, is available now for iOS devices from the App Store at <https://itunes.apple.com/app/euro-truck-driver/id1049690694>, and for Android devices from Google Play at <https://play.google.com/store/apps/details?id=com.ovilex.eurotruckdriver>.

Additional app information, including screenshots, photo gallery, blog and a video trailer, is available at [www.etdgame.com](http://www.etdgame.com).
