

Dodge Car Engines Now Reduced in Price for Mechanics at CarEnginesforSale.com

Dodge car engines are now reduced in price for mechanics courtesy of the CarEnginesforSale.com website. This new price reduction is designed to benefit mechanics that purchase motors for replacement into vehicles of preowned car owners.

San Antonio, Texas ([PRWEB](#)) January 02, 2013 -- Mechanics that work on Chrysler produced vehicles now have a way to save money purchasing a replacement engine. The CarEnginesforSale.com company has now lowered its pricing for mechanics that purchase Dodge car engines online or order offline. More information can be found about this new incentive at this link online <http://www.carenginesforsale.com/dodge-engines/dodge-car-engines-sale>.

This new reduction is designed to lower the overall purchase price to make installing a motor in a customer's vehicle less expensive.

Dodge produced the Intrepid, Stealth, Caliber, Colt, Dynasty and the Stratus. Many of these vehicles are still in use by preowned vehicle owners. The age of many cars can be one factor in the usability of the engine. A vehicle that is nearing or surpassed the 100,000-mile mark could be susceptible to breakdown.

Mechanics that repeatedly work on high mileage cars now have the ability to offer a replacement to customers for an affordable price. The lowering of the retail price of the rebuilt engine series is one way that this is now possible.

Engines that are rebuilt have parts changed out, calibration tests performed and other inspections to verify the reliability. The CarEnginesforSale.com company has invested into new tools and equipment that has helped to raise the quality levels for buyers. Additions like dyno testing now ensures that proper measurements are taken of each operating engine to provide a complete OEM based motor that is in line with automaker specs for a rebuild.

The new Dodge price reduction is part of a series of price drops that are designed to help reduce the cost of replacement engines. This plan was first put in place earlier this year and tested in specific areas of the U.S. The success of these price reductions has helped more brands become eligible for discounts online and offline.

The Chevrolet brand was one of the first reductions made and the news announcement for this first reduction can be found online at <http://www.sfgate.com/business/prweb/article/Chevy-Car-Engines-for-Sale-Now-Discounted-for-4153441.php>.

The new online quote system built for website customers is now available to use as an alternative to toll free telephone number quotes. The same information that a specialist provides over the phone is now offered through the new quote management system. Those searching for a replacement before or after regular business hours could benefit from this new price delivery feature.

About Car Engines for Sale

The Car Engines for Sale company now provides one of the largest rebuilt inventories that can be found online.

Through special pricing and other incentives, this company is able to sell its motors to car owners and those that perform installations in the automotive industry. This resource online is now visited by thousands of people weekly that search for replacement motors in all parts of the United States. The Car Engines for Sale company provides unlimited engine mileage warranties as well as same day shipments to online and offline customers that choose to purchase motors.
