

New at Summit Racing: BluePrint Engines Pro Series Chevy LS 427 Crate Engines

BluePrint Engine's new line of Pro Series Chevy LS 427 Crate Engines enhances the high performance reputation of the iconic 1960s Chevy 427 big block, offering an excellent fusion of power and reliability.

Tallmadge, OH ([PRWEB](#)) June 03, 2016 -- Chevrolet's new LS3 427 cubic inch engine is quickly earning the same reputation for performance as its late-1960s 427 big block namesake. BluePrint Engine's new line of Pro Series Chevy LS 427 Crate Engines enhances that reputation. In fact, a Pro Series Chevy LS 427 engine was recently featured in [Super Chevy magazine's "Week to Wicked" 1967 Chevy Chevelle Pro-Touring build](#).

There are four engines in BluePrint's Pro Series:

The Pro Series Chevy LS 427 C.I.D. 625HP EFI Retrofit Dressed Crate Engine is a virtually "drop-in and go" solution. It comes with everything required for installation, including an ECM that's already calibrated. The 427 LS3-based stroker uses cylinder heads of BluePrint's own design and cranks out an awesome 625 horsepower and 565 lbs.-ft. of torque.

BluePrint Engine's Pro Series Chevy LS 427 C.I.D. 625HP EFI Drop-In Base Crate Engine is a great option for owners of LS3-equipped vehicles looking for a close to 200 horsepower performance boost. The engine is a direct drop-in swap for the stock LS3, and all of the factory LS3 accessories (A/C, alternator, etc.) will bolt right on. Installers can send in the original factory LS3 ECM and BluePrint will calibrate it for free.

For builders who prefer carburetion to EFI, BluePrint Engines offers its Pro Series Chevy LS 427 C.I.D. 625HP Carbureted Retrofit Dressed Crate Engine. It boasts similar performance characteristics to its EFI brethren, without the wiring and plumbing required for fuel injection. The engine includes an intake manifold and carburetor, plus ignition coil packs and sensors. It's a proven "old school meets new school" setup that delivers impressive performance results.

The Pro Series Chevy LS 427 C.I.D. 750HP Supercharged Fuel Injected Crate Engine offers no-holds-barred performance. Thanks to its Magnuson TVS2300 supercharger, this turnkey engine cranks out huge power and torque, yet carries a 30 month, 50,000 mile warranty—try finding that anywhere else.
