Many of us remember the good times they had playing old school PC games like Carmageddon and Need for Speed Hot Pursuit 2. [Crazy Speed Racing](#) allows users to experience things they would never consider doing in real life. Going for a walk, meditating or doing yoga helps one loosen up. Nothing compares to wreaking some havoc downtown. Users have to drive as fast as they can, break all laws, blast, wreck and destroy whatever comes their way. The streets of the future expect you.

Through the game users enter a dark futuristic reality controlled by a rouge artificial intelligence. The biggest challenge is to stay alive for as long as possible in order to progress to the next level. Users arsenal of weapons includes smart bombs, armors, speed boosters and anti-magnets. These powerful toys will help them battle their way through each level and stay alive until the very last street battle against the synthetic dark matrix and its minions.

Crazy Speed Racing falls into the “free thrills” category. This easy to play game is suitable for all ages. The responsive tap and tilt game controls and user friendly menus deserve appreciation.
