

Redbourne Custom Land Rover Wheels' Newest Model, The Nottingham, Now Available in Matte Black

Now eighteen different Redbourne models and finishes, in both 20 inch and 22 inch diameters are available for every Land Rover and Range Rover.

Huntington Beach, CA ([PRWEB](#)) December 31, 2013 -- [Aftermarket Land Rover wheels](#) and [Range Rover wheels](#) represent a time-tested solution for drivers seeking to make a personalized statement about their vehicles. And few custom wheels on the market today make a stronger statement than the Redbourne Nottingham wheel finished in Matte Black. Like its classic Chrome and Hyper Silver brethren, the Nottingham is engineered in a wide range of specifications to precisely fit each model in the newly expanded Land Rover/Range Rover product lineup.

“Land Rover’s guiding design principle is the perfect balance of ruggedness and luxury,” observed Redbourne president Terence Scheckter. “At Redbourne, we design and manufacturer only Land Rover wheels and Range Rover wheels, and always with that perfect balance in mind. The Nottingham is our newest offering for these vehicles,” Scheckter added.

The Nottingham is a one-piece cast monoblock wheel, meaning molten aluminum is poured into a wheel mold in the manufacturing process. When cooled, the wheel undergoes finishing machining. The Nottingham features five bold, outsized spokes. The wheel comes in fitments to match perfectly the specifications of Land Rover LR3, LR3 SE, LR3 HSE, Range Rover Sport HSE, Range Rover Sport Supercharged, Range Rover HSE and the Range Rover Supercharged vehicles, including the all-new 2014 Range Rover Sport. The Nottingham is available in both 20” and 22” diameters, both in 9.5” width.

The Nottingham, like all Redbourne [Range Rover wheels](#), is engineered to comply with the requisite Land Rover 32mm offset and is designed to fit precisely over the center flange of the brake rotor, ensuring that the wheel is concentric with the wheel bearings for a truer, better balanced wheel/tire assembly and a smoother ride. Redbourne [Land Rover wheels](#) are compatible with the Land Rover tire pressure monitoring system and accept the manufacturer’s center logo cap.

Prospective visitors looking for custom [Land Rover wheels](#) can find a wealth of information on the Redbourne website at www.redbournewheels.com. The fitment guide found at redbournewheels.com/app_guide/index.php indicates full specifications for both 20” and 22” aftermarket Land Rover rims and aftermarket Range Rover rims ideally suited to each vehicle and includes recommended tire sizes for each application.

The Redbourne website also provides a helpful wheel configurator, which enables owners to preview each of the eighteen models and finishes of Redbourne Range Rover rims and [Land Rover rims](#) on various models, colors and model year vehicles. The site also provides a gallery of photos submitted by owners, providing additional opportunities to see how each Redbourne wheel looks on different model Land Rovers and Range Rovers.

Redbourne custom Range Rover wheels and custom Land Rover wheels are widely available at better tire stores and aftermarket wheel retailers nationwide. Shoppers can find a Redbourne dealer by zip code on the Redbournewheels.com website or by phoning 1-888-766-7775.
