All Traffic Solutions Spotlights the Latest Web - Based Traffic Calming Solutions at 2016 International Chiefs of Police Conference & Exposition

The largest and most important law enforcement event of the year

State College, PA (PRWEB) September 29, 2016 -- TraffiCloud™ is All Traffic Solutions' secure, web-based ecosystem for managing every component of a traffic safety program. Customers now have one place to easily connect, remotely manage and report on all of their traffic safety equipment and data.

On Sept. 29, 2016 All Traffic Solutions will spotlight their TraffiCloudempowered traffic safety solutions at the annual IACP Conference being held at the San Diego Convention Center from October 16th – 18th. The IACP expo attracts an audience of 14,000+ sworn officers and safety professionals looking for new, innovative technologies to help their departments operate more efficiently and effectively.

All Traffic Solutions invites attendees to Booth #3117 to learn how TraffiCloud can help with traffic calming, speed traffic safety & enforcement, complaint clearing, speed dependent messaging and cloud-based, real-time data collection and reporting. Their best-in-class traffic safety equipment including Radar Speed and Variable Message Displays, Hand-held Lidar, and Sensor-Free Traffic Data Collection Devices improve work flows, and combined with TraffiCloud provide a new level of awareness.

A major participant at the event, visible beyond the exhibit hall, All Traffic Solutions, at the Silver Level, is sponsoring attendee shuttle transportation between the hotels and convention center.

And, in recognition of Law Enforcements' effort to improve traffic safety, All Traffic donates a TraffiCloud enabled Speed Alert 24 Radar Message Display to the winning Police Department at the National Law Enforcement Challeng Awards held during the IACP Conference.

Valuable to anyone challenged by complicated technology or wanting to consolidate the way they manage their tools and information, the TraffiCloud provides a new level of awareness while reducing the amount of time needed to manage your equipment and information.
- Manage equipment settings remotely from any Internet-connected device
- Remotely create, deploy and share messages based on live data
- Visualize and map an entire traffic management program and data on an interactive map
- Automatically view data on your desktop and eliminate data file management
- Simply generate and share detailed reports anywhere at anytime
- Receive email or text alerts for low batteries, high speeds, tampering, congestion and more
- View images related to alert thresholds, or generate awareness images based on a preset frequency
- Increase data accuracy
- Provide new analysis and metrics for end-to-end traffic management
About All Traffic Solutions
Located in State College, PA., All Traffic Solutions is consistently recognized as a leading innovator in the traffic safety market for speed displays, message signs, imaging products and intelligent transportation systems, delivering groundbreaking levels of service and product capability. By integrating cloud technology into all of its products, All Traffic Solutions allows customers to manage all their equipment and data remotely, through a browser resulting in better traffic safety outcomes and initiatives related to vehicle-to-infrastructure solutions and smart cities.
