

## **All Traffic Solutions White Paper Explores How Public Works and Traffic Professionals Can Use Cloud-Based Traffic Data and Analytics to Achieve Traffic Management Goals**

*The paper suggests that agencies will see measurable results by employing an IoT strategy that includes a centralized web-based traffic management ecosystem and connected web-enabled traffic devices and sensors.*

Herndon, VA ([PRWEB](#)) May 22, 2017 -- All Traffic Solutions, the leader in cloud-based traffic management solutions for law enforcement, transportation and smart cities just released its latest white paper, How to Use Traffic Data and Analytics to Achieve Your Traffic Management Goals. This informative paper was written specifically for public works departments and other agencies responsible for traffic management and safety within their municipality who are challenged with shrinking budgets and limited resources.

The white paper provides proven ways that public agencies can utilize data and analytics as well as the right technology to streamline workflow, drive proactive planning and achieve measurable results, making roads safer for citizens now and in for the future.

According to the white paper, the key component of a winning traffic management strategy is one that includes web-enabled traffic devices and sensors that send data to a centralized online ecosystem for reporting in real time from any Internet-ready device.

How to Use Traffic Data and Analytics to Achieve Your Traffic Management Goals white paper is available now as a [free download](#).
