

Jaws Is the Newest Wheel Designed by Rucker Performance Wheel

Rucker Performance Wheel completed their latest creation - JAWS - a high-performance billet wheel for the Harley-Davidson Motorcycle aftermarket. You won't see this on Discovery.

Fort Worth, TX ([PRWEB](#)) April 10, 2005 -- Rucker Performance Wheel added Jaws to the popular line of custom wheels that include the Scimitar and the Dragster.

The Jaws wheel is a 3D billet CNC machined piece that looks and feels like true shark teeth. It is unlike anything available in the custom market today.

“Sharks are fast and sleek and these wheels really provide a distinctive look that set off a bike,” said Bill Rucker, President of Rucker Performance.

Jaws is built for the enthusiast that is looking for a unique style that is different from the old spoke and wheel design.

About Rucker Performance

Rucker Performance started production in 2004 and has quickly become a leading designer and manufacturer of custom American Muscle Bike and Chopper motorcycles. Rucker Performance is known for ground-shaking performance with fit and finish that is comparable to one-off custom motorcycles.

Additional design queues include soft-style suspension, high-performance V-twin 124 cubic inch engines, clean, sharp lines, 6-speed transmissions, stretch tanks and fat tires. Designing and manufacturing is performed at the company's headquarters in Fort Worth, Texas.
