

All Traffic Solutions Releases White Paper on New Technologies for Parking Facilities Management

Paper shares solutions to optimize parking availability, safety and revenue

Herndon, VA ([PRWEB](#)) November 20, 2017 -- All Traffic Solutions, the leader in cloud-based traffic management solutions for law enforcement, transportation and smart cities, has published a white paper New Technologies to Optimize Parking Availability, Safety and Revenue, which looks at new technologies that improve parking availability accuracy, calm traffic in and around parking areas and holistically manage and track parking inventory. Topics in this paper include:

All Traffic Solutions, the leader in cloud-based traffic management solutions for law enforcement, transportation and smart cities, has published a white paper New Technologies to Optimize Parking Availability, Safety and Revenue, which looks at new technologies that improve parking availability accuracy, calm traffic in and around parking areas and holistically manage and track parking inventory. Topics in this paper include:

- Optimizing revenue from parking permits, pay-to-park spaces and event parking
- The best parking availability and wayfinding technologies
- Web-enabled traffic devices that increase safety for parkers and pedestrians
- How to maximize efficiencies by managing transportation and parking together
- The importance of real-time parking occupancy data and analytics for planning and decision making

Included in this parking technologies white paper is a case study that describes how a major university was able to clear congestion in parking in surface lots and garages by tracking occupancy with the ATS ParkTrak plug-in-play counting system, and installing InstAlert variable message signs to display real-time parking availability.
