All Traffic Solutions to Present in Microsoft Public Safety Innovation Theater at 2017 IACP

Session will spotlight secure, flexible approaches to streamline complaint resolutions

Herndon, VA (PRWEB) October 22, 2017 -- All Traffic Solutions, the leader in cloud-based traffic management solutions for law enforcement, transportation and smart cities will present Leveraging Technology to Resolve Traffic Complaints, on Sunday, October 22 at 10:30 am in the Microsoft's Innovation Theater (Booth #3975) in the Expo Hall.

Kent Fullerton, Vice President of Product partnered with Rick Zak, Director, Justice & Public Safety Solutions at Microsoft, to host a lead highly informative session highlighting secure, flexible approaches to streamlining complaint resolutions.

Attendees will learn how a scalable IOT platform, All Traffic Solutions' connected traffic safety products and Microsoft's Azure features provided a solution to address Loudoun County Sheriff's Department traffic management challenges and provided them with real-time, sharable reports and actionable data allowing them to prioritize enforcement and better allocate resources.

All Traffic Solutions also invites law enforcement professionals to Booth #2657 for a demonstration of an all-in-one automatic license plate recognition (ALPR) or to learn how TraffiCloud™ All Traffic Solutions' cloud-based transportation management ecosystem can help with traffic calming, speed traffic safety and enforcement, speed dependent messaging and real-time data collection and reporting.

##

About All Traffic Solutions
Located outside Washington D.C. in Herndon, Virginia, All Traffic Solutions is consistently recognized as a leading innovator in the traffic safety industry for radar speed and variable message displays, imaging products and intelligent transportation systems, delivering groundbreaking levels of service and product capability. By integrating cloud technology into all of its products, All Traffic Solutions allows customers to manage all their equipment and data remotely through a browser, resulting in better traffic safety outcomes and initiatives related to vehicle-to-infrastructure solutions and smart cities.
