All Traffic Solutions to Feature Revolutionary Parking Counting Technology at 2017 Canadian Parking Association Conference

ParkTrak is First Plug-and-Play Counting Device to Deliver Over 98% Accuracy

Herndon, VA (PRWEB) September 29, 2017 -- All Traffic Solutions, the innovation leader in cloud-based traffic management solutions will feature ParkTrak, the first plug-and-play parking counting system that delivers greater than 98% accuracy, at the Canadian Parking Association Conference which takes place at the Fairmont Banff Springs Conference Center in Banff, Alberta on October 18-19, 2017.

Pre-configured for cellular connectivity with TraffiCloud™, All Traffic Solutions' cloud-based traffic management ecosystem, ParkTrak uses directional logic for detection, which delivers higher accuracy than loops or cameras, and enables the device to recognize vehicles that are backing up, entering or exiting in the wrong direction or tailgating, as well as other anomalies such as pedestrians, carts and bicycles.

The Canadian Parking Association Conference attracts world-class speakers and an audience of decision makers from airports, hospitals, colleges and universities and municipalities, as well as consultants and suppliers who are interested in the latest and best parking products, solutions and services on the market.

All Traffic Solutions invites attending parking professionals to Booth 33 to learn more about how our web-based technology and solutions can help with the fundamentals of prevention and preparedness planning in and around corporate facilities, universities, airports, healthcare facilities, sports and entertainment venues, military campuses and smart cities projects.
