Reliability and Pricing: SHRP2 C04 Application in SANDAG ABM

TMIP Webinar, January 18, 2017

Wu Sun
San Diego Association of Governments
(SANDAG)

San Diego Region

- Square miles: 4,261
- Population:
 - 2015-3.23 million
 - 2050-4.07 million
 - 2nd in California
 - 8th in the United States
- Median HH income:
 - -2015-\$67,320
- Location

Project Overview

Objectives

- Move research into practice
- Improve ABM to increase sensitivity to pricing alternatives
- Incorporate value of travel time reliability(VOR) in ABM
- Improve value of time (VOT) treatment

Schedule

-02/2015-06/2016

SANDAG ABM Timeline

Byear 2010 Byear 2012 ABM Database Version Mgmt.

AT Model

PopSyn III Byear 2012

ABM Update

ABM Development 01/09-01/13

Transition & Enhancements 01/13-12/13

SD Forward Applications 01/14-10/15

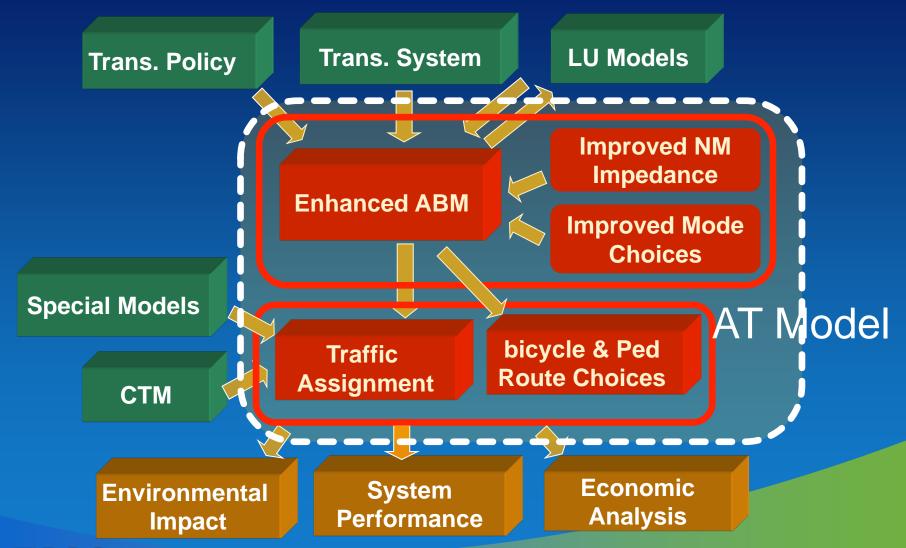

Enhancements 10/15-08/16

ABM Update w/ 2017 HHTS
Starts in 07/2017

SANDAG ABM

How does SHRP2 C04 benefit SANDAG?

- Improved quantitative analysis tools for San Diego Forward: The Regional Plan
- Analysis of innovative pricing policies
 - Managed lane (ML) policies
 - Toll road policies

Managed Lanes and Toll Roads in San Diego

- Managed lanes
 - Express lanes; Carpool lanes (aka HOV lanes); Transit-only lanes
- Existing ML and toll facilities
 - I-15 and I-805 (30 miles)
 - SR-125 (toll road)
- Planned ML and toll facilities
 - I-5, 15, 805; SR 52,54,78,94 (160 miles)
 - SR11, I-5, and I-15 (toll roads)

Treatments of Time and Cost

SANDAG ABM			
		Current	with C04
Travel Time	Quantity	Yes	Yes
	Quality	Yes	Yes
	Reliability	No	Yes
Travel Cost	Actual cost	Yes	Yes
	Affordability	Yes	Better

Resources Needed for the Application

- Mobile device-based data (INRIX)
- Traffic counts on ML/toll facilities
- Computers with large memory and fast processing speed

Accomplishments

- Implemented SHRP2 C04 recommendations in SANDAG ABM
- Improved assignment results on managed lanes
- Potential benefits to other agencies

Lessons Learned

- ABM & C04 application
- New data sources for VOR
- Localization of C04 recommendations
- Static traffic assignment/DTA in incorporating travel time reliability
- Computational and runtime impacts
