

Modified Taxicab Sign Invented by InventHelp Client (LST-574)

InventHelp, a leading invention firm, is submitting the GREEN LIGHT to companies for their potential feedback.

PITTSBURGH, PA ([PRWEB](#)) January 02, 2016 -- “I am a taxicab driver,” said an inventor, from Goleta, Calif., “and I thought there could be a green way to advertise cab services, so I invented this.” He invented the GREEN LIGHT.

The GREEN LIGHT provides an improved way to advertise taxicab services. In doing so, it eliminates the need to permanently apply a sign to a vehicle. As a result, it could help to protect and preserve the vehicle’s roof and it offers added convenience. The invention features an environmentally-friendly design that is easy to install and remove so it is ideal for taxicab companies. Additionally, the GREEN LIGHT is producible in design variations.

The inventor described the invention design. “My design helps to conserve energy while preserving the exterior of a taxicab.”

The original design was submitted to the Los Angeles office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 14-LST-574, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
