

New As Seen on PowerNation TV Product: Royal Purple Max-Clean Fuel System Cleaner

Max-Clean is a state-of-the-art synthetic fuel cleaner that penetrates and cleans injectors and carburetors. Tests show it improves fuel economy an average of 3.2 percent and horsepower about 2.6 percent.

Tallmadge, OH ([PRWEB](#)) January 09, 2016 -- [Royal Purple Max-Clean](#) is a state-of-the-art synthetic fuel cleaner that penetrates and cleans injectors and carburetors. Tests show it improves fuel economy an average of 3.2 percent and horsepower about 2.6 percent. It may also fix a rough idle, hesitation, stalling, deposit-related engine knock, and premature spark plug fouling.

As an added benefit, Royal Purple Max-Clean can be used as a fuel stabilizer for long-term vehicle storage. Left untreated, gasoline (especially modern ethanol-blended fuel) can absorb water, which will cause a fuel system to actually rust from the inside out. Max-Clean safely stabilizes fuel, making it really handy for maintaining summer drivers, lawn mowers, boats, motorcycles, and snowmobiles.

Royal Purple Max-Clean is CARB- and EPA-compliant, and won't harm specialized emissions equipment. It works for diesel fuel and gasoline, and 2- and 4-cycle engines—including modern direct-injected motors. Royal Purple recommends using one 20 ounce can every 10,000 miles to treat a single tank up to 20 gallons.

PowerNation TV's Engine Power folks like this stuff too. They featured a bottle on their "Galaxie Teardown" episode. [Watch it here.](#)
