

Newest StowAway 2 Hitch Mounted Cargo Carrier Allows for Easy Access to Rear of the Vehicle

([PRWEB](#)) May 6, 2000 -- Portland, OR-Ironwood Pacific, Inc., manufacturer of the StowAway® Cargo Carriers for SUVs, vans, and RVs, today announced immediate availability of its innovative new Swingaway frame model. The Swingaway model pivots open to allow the user easy access to the rear of their vehicle, without having to remove the StowAway® from the receiver hitch.

The StowAway® Cargo Carrier offers the traveler the additional space that they often need for their luggage and gear. By fitting directly into the vehicle's rear receiver hitch, the StowAway® offers far better accessibility than rooftop racks, while avoiding the wind drag effect associated with rooftop designs. The new Swingaway model also offers clear access to the vehicle's rear storage, by pivoting out away from the vehicle.

“The Swingaway model includes all of the winning features and contemporary styling of the original StowAway®, with the added convenience of the swing out feature,” said Jim Stewart, President of Ironwood Pacific, Inc. “Sport Utility Vehicle owners have expressed strong interest in the Swingaway model at regional trade shows, and we expect it to become our best selling model.”

With prices ranging from \$399 to \$499, and features such as a lockable latch, full function taillights, and four frame options, the StowAway® Cargo Carriers offer outstanding value to the SUV, van or RV owner. The StowAway®'s contemporary, yet functional design makes it ideal for a wide range of outdoor and travel applications.

Founded in 1994, Ironwood Pacific, Inc. is a leading edge manufacturer of outdoor recreational products. The company offers a wide range of marine products as well as four models of the StowAway® Cargo Carrier. Their mission is to create high quality outdoor recreational products for lifestyles that demand performance.
