

Avoid Falling Asleep While Driving With DRIVE SAFE - Designed by InventHelp Client (BRK-1116)

Pittsburgh-based InventHelp is working to submit the DRIVE SAFE to appropriate companies for their consideration.

PITTSBURGH, PA ([PRWEB](#)) December 23, 2015 -- An inventor from Grove Oak, Ala., knows how dangerous it is for people to drive while tired. "After a friend of mine was almost killed because he fell asleep while driving," he said. "I decided to design a reliable way to prevent this from happening."

The DRIVE SAFE provides a reliable way to prevent a driver from falling asleep at the steering wheel. This avoids road accidents, injuries, fatalities and damage. As a result, it promotes safety and peace of mind. The device is easy to use, portable and compatible with all vehicles.

The original design was submitted to the Birmingham office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 14-BRK-1116, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
