

Device Facilitates the Use of Parking Passes and ATM Cards for Drivers - Designed by InventHelp Client (FLA-2678)

A leading invention submission company, InventHelp is submitting the ACCESS WAND to companies for their review.

PITTSBURGH, PA ([PRWEB](#)) December 28, 2015 -- It can be a hassle to use parking passes or AYM cards while sitting in a vehicle, especially of one is elderly and/or physically disabled. "My ergonomic invention solves this problem," said an inventor from West Palm Beach, Fla.

The ergonomic and easy-to-use ACCESS WAND is a device that enables a driver to use a parking pass or ATM card more conveniently. It eliminates the need to exit the vehicle or lean out of its window. It also allows for safe clearance between the vehicle and a wall or protective posts. Overall, it promotes peace of mind. The device is suitable for all drivers, especially those who are elderly and/or physically disabled.

The original design was submitted to the Fort Lauderdale office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 14-FLA-2678, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
