

InventHelp Inventor Develops Hassle-Free Earbuds (LAX-681)

One of America's leading invention firms, InventHelp is submitting THE CRAB to applicable companies for their consideration.

PITTSBURGH, PA ([PRWEB](#)) December 30, 2015 -- "I always thought it was important to use my headphones while driving, but the extra time it took me to untangle wires was too much of a hassle when I was in a hurry," said an inventor from Northridge, Calif.

He developed THE CRAB to allow for the use of headphones without any tangled wires. This saves the user from having to repeatedly untangle stubborn wires, which eliminates hassles and frustrations. The unit provides a safe and easy way to make hands-free calls while driving. Furthermore, the earbuds are usable with multiple types of devices.

The original design was submitted to the Los Angeles office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 14-LAX-681, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
