InventHelp Inventor Develops Cover to Protect a Vehicle and Occupants (LAX-688)

InventHelp, founded in 1984 in Pittsburgh, is submitting the CAR SHADE to companies in the hopes of a good faith review.

PITTSBURGH, PA (PRWEB) December 30, 2015 -- "I see too many news reports about people and pets who are seriously injured or killed because they overheat when left in a vehicle on a hot summer day," said an inventor from Los Angeles, Calif. "I thought that there had to be a way to avoid such needless tragedies."

He developed the CAR SHADE to effectively shield the vehicle from harsh sunlight. The cover keeps the interior from overheating while the vehicle is parked outdoors on a bright, sunny day. This ensures that any individual or pet in the vehicle is safe from hyperthermia. The cover also protects the vehicle from dents, dings and scratches. It is designed for ease of deployment and removal. The accessory is adaptable for use with virtually any vehicle. Additionally, the invention offers added peace of mind when leaving the vehicle parked outdoors.

The original design was submitted to the Los Angeles office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 14-LAX-688, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
