New world land speed records, for hybrid-electric vehicles and for electric-only vehicles will be assisted by Access software supporting the project.

This attempted record means that the world's fastest car could be powered by electricity within the next two years. The revolutionary vehicle using electricity and gas turbine power to challenge the wheel-driven land speed record is designed by Martin Bryant who worked as a designer and engineer for top industry names such as Williams, Ligier and Arrows Formula 1 teams.

Access re-seller E-Advantage Solutions will be providing complete 'Out-sourced IT Management' for the E-commerce website and back-office systems for the project.

Created by Pegasus Electric Ltd using zero/low emission power sources, the hybrid-electric version is a World-first and will target achieving speeds in excess of 500mph, while the electric-only version will target speeds in excess of 300mph. The current world land speed record for electric-only vehicles is 245mph, set by an American Team in 1997.

The overall record for wheel-driven vehicles stands at 410mph, set in 1965 by the Americans. Pegasus Electric using hybrid turbine electric motors are ultimately planning to hit 700mph! Not far short of the Thrust rocket-powered speed of 763mph.

E-Advantage Solutions are pleased that all their software suppliers are providing the software at no cost. Managing Director Cliff Jenkins said, 'We are particularly grateful to Access Accounting Ltd, as the solution could not be put together without the Access 'web-enabled' back-office system - this enables seamless integration with Accessweb for the web site front end. Access software was fast to use which is essential when you are working for free.'

To make the web site more user-friendly for the thousands of expected

visitors, Formatt Solutions Ltd are providing the use of their "AnswerShop" software, similarly at no cost.

Access Managing Director Alistair O'Reilly said, "We have broken a few records in our time: being the first to bring true Windows to the mid-range accounts market; the first to introduce a mid-range Client/Server solution; the first to deliver a packaged business to business e-commerce solution and the first to embrace Microsoft's .NET strategy. Now our software is set to help the world's fastest car smash another record."

Cliff Jenkins, Managing Director of E-Advantage Solutions Ltd, commented "We are very excited to be working with Martin Bryant, using his experience as an F1 designer for Williams, Ligier and Arrows, and in helping him to achieve his objectives. We will all be there to see this fabulous car in action. Let us wish Martin and his team every success in taking this incredible technology into new areas."

-Ends-

Products for review, pictures and further information can be obtained from Paul Wellings (Head of Media) or Kim Moore (Marketing Manager) on 01206 322575 or e-mail [pw@access-accounts.com](mailto:pw@access-accounts.com) or from [www.access-accounts.com](http://www.access-accounts.com)

#### BACKGROUND NOTES:

Access Accounting Ltd was formed in 1991 to bring the benefits of Windows to accounting software. Its software is in use today by over 10,000 companies worldwide. Software is sold in the UK through a national network of Specialist Centres and internationally through Access partners.

All Access software is designed, developed and delivered from its Colchester headquarters in the UK.

Access Accounts offers a complete range of Windows 2000 and PowerPC, web enabled financial management and accounting software that scales to suit your size of business and your budget. Principally everything you can do in one level of software can be done in each higher level without re-training staff or re-entering data. Access is a pioneer in financial data management with modules encompassing buying, selling, ordering, costing and inventory control all fully web enabled and with powerful management reporting.

The company also offers a range of web management software producing business to business and business to consumer e-commerce solutions and marketing web sites. An innovator in e-commerce solutions, Access Accounting Ltd requires its dealers to place all their orders over the Internet using Access software which instantly updates the back office accounts. This was designed by Access to give its own business the advantage of e-commerce.

Dimensions is the flagship Client/Server software for large companies with up to 200 concurrent users. It has 30 modules plus multi-currency, Euro compliancy, dual-base currency and multi-lingual options.

Dimensions SBE is Client/Server software for medium sized companies with up to 20 concurrent users. It is a single currency version of Dimensions.

Horizons is suitable for medium sized companies with up to 15 concurrent users. It has 30 modules plus multi-currency, Euro compliancy and dual base options.

Foundations is suitable for small companies or departments of companies with just one concurrent user. It has

23 modules plus multi-currency options.

Access Payroll is a complete PAYE and personnel records system, scalable from five to five thousand staff per datafile. This fully integrates to the entire Access Accounts range.

Accessweb is a web management system that creates marketing web sites and e-commerce web shops for business to business solutions that are fully integrated to Access Accounts entire range of financial packages. It is scalable to suit companies large and small.

Transaction Broker is ground breaking technology brokering data and transactions from virtually anywhere into all of the Access Accounts range of financial software, making Access Accounts the universal back office solution.

It is accredited under the Accredited Product Scheme run by the Institute of Chartered Accountants in England and Wales (ICAEW).

Access released its EMU compliant software in 1998. It offers dual based currency, triangulation and the ability to report in home currency, the Euro and in multiple foreign currencies. It achieved BASDA EMU accreditation for Multi-Currency and Triangulation in 1999 - one of an elite group in the world to receive this accreditation.

Its Payroll package won the PC Pro Excellence Award and it is IMIS accredited.

Access software has recently received favourable reviews from a wide range of reputable media titles including The Times, The Telegraph, Internet Works, PC Plus, Financial Systems News and many more. Click on this link for further information:
