

A revolutionary idea in vehicle and freight transportation.

([PRWEB](#)) February 16, 2001 -- The Switch Hitter

Seattle, Washington.

Â A revolutionary idea in vehicle and freight transportation.Â

The Switch Hitter is a new and revolutionary highway freight trailer that can operate in three configurations:

1. It can transport cars, trucks and SUVs
2. It can collapse to carry general freight as a flat deck
3. It can operate as a two-level Double Decker freight transporter to eliminate cube-out situations.

The Switch Hitter operates using entirely new principles that allows for operating in these three different configurations.

No Empty Backhauls

The main challenge in making trucking profitable is eliminating the empty and unpaid miles being driven. Using the Switch Hitter will eliminate empty backhauls and ensure that every mile driven will carry freight. No lost billable miles traveled. The increase in the freight carrying flexibility and available freight carrying options will enable the operator to always generate revenue and eliminate driving empty miles. The flexibility available with the Switch Hitter permits the carrying of many different types of freight; including vehicles, and this ensures that there are no empty and unpaid miles.

Amazing flexibility

The double deck option of the Switch Hitter is a very unique feature that is not available with any other trailer. Not all freight comes in nice rectangular boxes. A great amount of freight is of irregular size or shape and requires being loaded flat on a floor surface. With the Switch Hitter you nearly double your deck surface to carry this type of irregular shaped cargo.

Options for the Transportation Industry

For the first time, the trucking industry has options. Every mile that the Switch Hitter is on the road means more revenue. The Switch Hitter is available and it is time to rethink how you want to maximize your trucking revenue. Purchasing the Switch Hitter will give you a very solid competitive advantage over your competitors. The owner of the Switch Hitter is THE low cost hauler and can survive any economic downturn.
