Bike Rack Hits the Slopes -

As Delta Cycles Hunch Rack
now accommodates Skis

DATELINE: Foxboro, MA; issued November 3, 2000 . . .

Delta Cycle's Hunch Rack has long been beloved as a carrack that provides a "no scratch" solution to the challenge of carrying bikes. Now a simple addition allows the rack to solve the same equation for getting your ski gear to the slopes.

An optional ski mount adapter converts the Hunch Rack from a bike rack to a ski rack. The nifty adaptation can accommodate two sets of skis - a special adaptor for snowboards is in development. Now the versatile rack can get the job done in any season.

Easily assembled in less than ten minutes, the heavy-duty Hunch Rack was designed for maximum versatility and attaches to virtually any car. Top quality engineering provides super-strong support and rigidity. Loads of foam padding and coated hooks keep vehicle, bikes, snowboards and skis safe from scratches.

Attaching to the trunk, hatchback or tailgate of almost any vehicle, the Hunch Rack is held securely in place by adjustable web straps with coated hooks and non-slip buckles. One or two bikes can be carried, with front forks securely clamped and rear wheels held with quick-release straps. Bikes can be locked in place with a standard padlock. A holder that carries two front wheels is included with the Hunch Rack system. It's like having the benefits of a roof rack without all the bother.

The versatile Hunch Rack will transport your gear in any season, and will outlive your current vehicle, no matter what model you buy next. The Hunch Rack retails for \$99.50, with the optional ski mount attachment available for \$24.99.

From bike racks to brake pads, Delta Cycle is an innovator. The Hunch Rack and other Delta Cycle products are sold in fine bike and outdoor stores throughout the country. For additional information, or to order the Hunch Rack online, visit www.deltacycle.com, or call (800) 474-6615.
