

Inventor and InventHelp Client Develops Easy-To-Use Barrier (LST-399)

InventHelp, a leading inventor service company, is working to submit this idea, the Water Filled Barrier, to companies in the hopes of a good faith review.

Pittsburgh, PA ([PRWEB](#)) January 01, 2014 -- An inventor from Tehachapi, Calif., has created a prototype for an efficient barrier.

WATER FILLED BARRIER offers a convenient way to block off a driveway, trail, parking lot, etc. The unit remains firmly in place. It will not tip over or be blown down. The device is easy to set up and take down. Additionally, it can be put up wherever it is needed. The invention is patent-pending.

The inventor's professional experience inspired the idea. "I had a need for an easily portable barrier for use at work," he said.

The original design was submitted to the Los Angeles office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 12-LST-399, [InventHelp](#), 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
