

Parking in Hoboken Just Got Easier

Valet King is proud to introduce Hoboken's first curbside pick-up service. Why Walk?

Hoboken, NJ ([PRWEB](#)) January 01, 2015 -- Valet King is the first company to offer valet parking in the city of Hoboken. With 13,000 residential parking permits issued and only 8,900 hundred curbside spaces available in the city, parking is always a major issue. Valet King has recently launched a pilot program for the city which allows Valet King to have valet queuing stations setup in loading zone areas. Loading zones have been selected so valet queuing areas wouldn't occupy anymore of the city's already limited space. Residents would rather accept their parking situations then move their vehicle because it's still cheaper then paying for a garage.

Valet King's plan is to service Hoboken's visitors with valet parking allowing free spaces on side streets as well as convenience. Valet King Curb Side service allows patrons to text their pick-up location and an attendant will pick up the vehicle as well as meet them to drop off the vehicle whenever they are done. Many people take advantage of the service on the weekend to go shopping in NYC. Valet King uses municipal garage B to park patrons vehicles, which is a safe and monitored parking garage located at 28 2nd street. The garage has gated pay stations using a system to enter the garage as well as leave.

Valet King Hoboken Queuing Stations are currently located at:

- 3rd & Washington Street
- Hudson St & Hudson Pl (Located Near Path Entrance)

To use our text service, please text the following to (512) 626-3356 10 minutes before arrival:

1. Location of pickup
2. Make, model and color of car
