

Parking Panda Partners with Amano McGann, Inc. to Bring Unprecedented Digital Access to Thousands of Parking Garages

Parking Panda and Amano McGann, Inc. partnership will provide drivers and parking operators with the most streamlined parking solution available today.

Baltimore ([PRWEB](#)) December 21, 2015 -- Parking Panda, the nation's leading app for on-demand parking, has partnered with Amano McGann Inc., the world leader in parking automation, to announce the integration of Parking Panda's PandaScan technology with Amano's OPUSuite® Cloud application and FlexScan® on-premise technology. This integration will provide drivers and parking operators with the most streamlined parking solution available today. Users will have the ability to find and book pre-paid parking through Parking Panda's mobile app or website and seamlessly scan into any Amano parking facility with the FlexScan and OPUSuite capability. Reservations will be consolidated and available for both count and revenue reconciliation with OPUSuite.

Amano's OPUSuite Cloud® application consolidates operational and financial data allowing for the remote management of any number of facilities for consolidated management, reporting analytics and PandaScan. Seamless integration of the FlexScan reads both 2D and linear barcodes from a variety of media, ranging from paper to I.D. badges and smartphones.

“We are very excited to partner with Parking Panda, a company that shares our passion for innovation in parking technology,” commented Joe Survance, Senior Vice President – Marketing and Business Development for Amano McGann. “Our collaboration provides parking patrons with ease-of-use at facilities with Amano’s OPUSuite and FlexScan technologies. This forward-thinking approach will enhance the experience for both operator and the customer.”

"Our partnership with Amano McGann is proof of our unwavering dedication to improve the parking experience for our users and operators," said Parking Panda CEO, Nick Miller. “This integration will provide our users with an increased level of convenience and mobile access, while our partner operators enjoy more control and easier management through this automated technology. We're proud to be working with Amano McGann to make parking a lot easier and more efficient for drivers and operators alike.”
