

Now at Summit Racing Equipment: Auburn Gear Ring and Pinion Gear Sets and Installation Kits

The right rear axle gearing can make or break vehicle performance. Summit Racing offers Auburn Gear Ring and Pinion Sets for a wide range of performance applications from rock crawling to the quarter-mile, plus Installation Kits to make gear swapping hassle-free.

Tallmadge, OH ([PRWEB](#)) February 08, 2016 -- The right rear axle gearing can make or break vehicle performance. Summit Racing offers [Auburn Gear Ring and Pinion Sets](#) for a wide range of performance applications from rock crawling to the quarter-mile, plus Installation Kits to make gear swapping hassle-free.

Each set includes matched ring and pinion gears built to tight tolerances. This eliminates excessive noise, vibration, and premature gear wear. Gear ratios are available from a very “short” 5.38:1 to a more street friendly 3.42:1.

Auburn Gear has also assembled Master Ring and Pinion Installation Kits that have everything required for a gear swap. The kits come with hardware, shims, bearings, and hardware. Auburn Gear’s even nice enough to toss in assembly lube and a tube of gasket maker. Exact contents of each kit vary by application.

Summit Racing offers Auburn Ring and Pinion Gears and Installation Kits for these popular axles:

- Chrysler 9.25 inch
- Dana 30, 44, 60, 80
- GM 7.5, 7.625, 8.5, and 8.6 inch
- Ford 8.8 and 9 inch
