

Inventor and InventHelp Client Designs Aid for Easy Vehicle Transfers (POO-136)

Founded in 1984, InventHelp is submitting the C T RAMP to appropriate companies for their consideration.

PITTSBURGH, PA ([PRWEB](#)) December 18, 2015 -- Founded in 1984, InventHelp is submitting the C T RAMP to appropriate companies for their consideration.

An inventor from Salem, Ore., wanted to provide an effective means for a disabled or elderly person to easily enter and exit a parked pickup truck. As such, he designed the patent-pending C T RAMP to improve the quality of life and personal mobility of handicapped individuals by encouraging them to travel more frequently.

The C T RAMP is portable, lightweight and inexpensive. It also reduces the strain on caregivers and spouses. Furthermore, it eliminates the need for an expensive, specially outfitted van for handicapped people.

The inventor was inspired by his wife and a need to provide her with a way to easily transfer in and out of a vehicle. "It allows her to get outside the home to shop, get groceries, go to the library, go on vacation, and visit the doctor and hospital," said the inventor. "This minimized strain for both of us."

The original design was submitted to the Portland office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 14-POO-136, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
