

## **Inventor and InventHelp Client Designs COMPACT CAR SEAT (TOR-9405)**

*InventHelp, founded in 1984, is submitting the COMPACT CAR SEAT to companies for their consideration.*

PITTSBURGH, PA ([PRWEB](#)) December 20, 2015 -- An inventor, from Toronto, Ontario, Canada, thought there needed to be a more compact way to store a child's car seat when not in use, so he invented the patent-pending COMPACT CAR SEAT.

The COMPACT CAR SEAT provides an easier way to carry, transport and store a child's car seat. In doing so, it offers a more practical alternative to a standard car seat. It also ensures that a child's car seat is readily available when needed and it saves time and space. The invention features a compact design that is convenient and easy to use so it is ideal for parents, grandparents and caregivers of young children. Additionally, the COMPACT CAR SEAT is easy to store when not in use.

The inventor described the invention design. "My design provides a space-saving way to store a car seat in the trunk or house."

The original design was submitted to the Toronto office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 14-TOR-9405, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
