

New at Summit Racing Equipment: McGaughy's Suspension Lowering Kit for 2009-15 Dodge/Ram

Summit Racing now carries McGaughy's Suspension Lowering Kit for 2009-15 Dodge Ram 1500 trucks. The kit lowers the truck two inches in front and four inches in the rear without sacrificing towing performance.

Tallmadge, OH ([PRWEB](#)) March 07, 2016 -- Summit Racing now carries [McGaughy's Suspension Lowering Kit](#) for 2009-15 Dodge Ram 1500 trucks. The kit lowers the truck two inches in front and four inches in the rear without sacrificing towing performance. More importantly, McGaughy's uses OE-quality parts to retain the vehicle's original steering/suspension geometry, which prevents premature component wear.

The McGaughy's kit includes rear coil springs, sway bar end links, track bar relocation brackets, and new bump stops. It also has a set of McGaughy's "Classic Drop" spindles, CNC-machined from 4140 chromoly steel—plenty tough enough for towing duty. The kit re-uses the truck's factory front struts.

PowerNation's Truck Tech team installed a McGaughy's Suspension Lowering Kit on its 2013 Dodge Ram "Hemi Hauler" project. The Truck Tech folks wanted a suspension kit that gave the truck a lowered stance, yet would still allow it to pull a loaded trailer. Combined with a set of air springs, the McGaughy's kit fit the bill. [Watch the full episode.](#)

Summit Racing also carries McGaughy's Suspension Lowering Kits for other popular full size trucks and SUVs, including the 1997-2013 Ford F-150 and 1999-2015 Chevy Silverado/GMC Sierra. The contents of each kit vary by the vehicle application.
