

S.E.A.L. Security Solutions Selects IPVideo Corporation's SentryVMS for Its Mobile Fleet of Security Trailers

S.E.A.L. Security, of Houston, Texas, will standardize its fleet of mobile security and surveillance trailers using the SentryVMS video management platform from IPVideo Corporation. The trailers feature cameras on a telescoping mount that transmit video via cellular 4G to a monitoring center.

([PRWEB](#)) March 07, 2016 -- IPVideo Corporation, manufacturer of IP-based video surveillance and command center solutions, today announced that S.E.A.L. Security Solutions of Houston, Texas, has selected SentryVMS as the video management platform to support its redesigned fleet of mobile security and surveillance trailers. The company's mobile security camera trailers feature up to 6 high resolution PTZ cameras on a telescoping mount that transmit video via cellular 4G back to S.E.A.L.'s central command and live monitoring center. S.E.A.L. Security offers mobile security trailers in electric and solar self-contained systems.

S.E.A.L.'s mobile camera systems provide a convenient and rapidly deployable solution for remote security and surveillance at construction sites, residential areas, businesses, parking lots, outdoor events, and other locations where there is need for temporary 24/7 security. Rhedonda Cox, S.E.A.L Security's Director of Surveillance and Business Development conveys that all camera systems also come standard with armed emergency response by S.E.A.L. Security officers, a unique feature in the surveillance industry. The cameras on each security trailer, licensed with SentryVMS software, are controlled from S.E.A.L.'s command /monitoring center and can be easily and securely accessed remotely as well via the SentryVMS web interface or mobile app.

S.E.A.L. Security added mobile surveillance capabilities 5 years ago to complement its tactical security patrol & K-9 services both domestically and abroad. The decision to standardize on SentryVMS for its fleet of mobile security camera systems was made after careful trial and evaluation of potential solutions. S.E.A.L.'s Chief Information Officer, Benjamin Hatfield, explains that the company was particularly impressed with SentryVMS's stability and system features. Its ability to respond to on-site motion alerts and support high resolution video without dropping frames was particularly important, after the company recently tested and observed poor results with a less robust VMS solution.

Steve Rice, IPVideo's Director of Business Development, says "We are very excited and honored to be chosen by S.E.A.L. Security as a strategic partner as they expand their reach in the mobile security and surveillance market. The flexibility of our SentryVMS solution is an excellent choice for a wide range of non-traditional applications, and S.E.A.L.'s choice to work with us helps to verify this." For more information about SentryVMS, visit www.ipvideocorp.com or visit IPVideo booth 19116 at the upcoming ISC West Exhibition in Las Vegas, April 6-8. S.E.A.L. Security can be contacted at 713-979-2388 and online at www.SEALSecurity.com, appointments can also be scheduled to meet with them at the IPVideo booth at ISC West.

About IPVideo Corporation: An industry pioneer since its introduction of one of the first network-based surveillance recording solutions in 1996, IPVideo Corporation is now at the forefront of developing unique, innovative solutions that harness the power of IP video technology. Today, the Company's systems are trusted by Fortune 500 companies, government agencies and municipalities, utilities, healthcare facilities, school districts and leading universities to mitigate risk while protecting people and property. A commitment to an open-standards philosophy and delivering best-in-class performance and value underlies all offerings—from

physical security solutions that bridge to the Internet of Things, to purpose-built HD audio/video recording solutions for education, law enforcement, healthcare, and beyond. The company's worldwide client base is served by a network of certified distributors, dealers and system integrators, who benefit from ongoing corporate support and training. IPVideo Corporation is headquartered in Bay Shore, NY. For more information, visit <http://www.ipvideocorp.com>.

About S.E.A.L. Security: S.E.A.L. Security Solutions, LLC is the premier provider of integrated security services on the Texas Gulf Coast, offering armed, K9-equipped, patrol services and both fixed and mobile camera surveillance solutions. SEAL employs over 200 private security officers, including over 100 US Armed Forces veterans, and over 70 trained dogs. SEAL's rapidly growing patrol footprint covers more than 25% of the entire Houston metro area. Customers include city management districts, utility districts, homeowner's associations, commercial property owners, construction companies, multifamily housing operators, and a wide variety of other clients, who benefit from SEAL's proactive approach to crime deterrence. SEAL's state-of-the-art camera platforms include both line-powered and solar models, and offer the added benefit of armed response to alerts and alarms by SEAL's officer force. SEAL has a history operating in complex and dangerous environments, including a long history of supplying anti-piracy services to ship owners who's vessels ply dangerous waters, like the Gulf of Aden off the coast of Somalia. SEAL has proven over the years that it is up to any security challenge its customers might face. SEAL is licensed by the Texas Department of Public Safety: P.S.B. License # 15942
