

Innovations Explores Latest Developments in Transportation, Featuring Public Transportation Safety International Corp.

DMG Productions educates on the latest breakthroughs in the transportation industry.

Jupiter, FL ([PRWEB](#)) March 23, 2016 -- Innovations with Ed Begley Jr., announced today that it will feature Public Transportation Safety International Corp. (PTS) in an upcoming episode, airing third quarter 2016 via Discovery Channel. Dates and show times TBA.

In this episode, Innovations viewers will be educated on the S-1 GARD Dangerzone Deflector: a securely mounted maintenance-free barrier installed in front of the right rear wheels of a transit bus or motor coach, designed to deflect a person out of the path of the wheels, preventing catastrophic injury or death.

Spectators will learn about its patented new impact-resistant receiver design, guaranteed for the life of the bus, and how this has improved energy absorption and is engineered to withstand poor road conditions and operator's abuse. In addition, audiences will also learn about what it takes to bring a product like this to market.

“Public Transportation Safety International Corp. has been in business since 1994. It took approximately seven years of relentless work and tireless dedication to jump start s-1 GARD project, with Santa Monica BBB and LAMTA soon followed. Over the years, PTS has since developed the Dangerzone Barrier,” said Mark Barron, President for PTS.

“The S-1 GARD Dangerzone Deflector and S-1 GARD Dangerzone Barrier are cast using only the best BASF polyurethane available and will last for as long as any transit bus is in service,” said Eric Buckley, Producer for the Innovations TV Series. “We look forward to educating the public on technologies such as these, and to enlightening them on what it takes to break through the red tape, and make an idea a reality.”

About Public Transportation Safety International Corp:

PTS is the leader in pedestrian and cyclist safety for transit buses worldwide, and school buses in the United States and Canada. PTS holds the Intellectual Property on all products, which it has developed and designed for pedestrian and cyclist safety.
