

ALK Technologies Launches New CoPilot RV App

Provides Offline GPS Navigation for Safe Routing of Recreational Vehicles and Motorhomes

([PRWEB](#)) March 23, 2016 -- ALK Technologies, a Trimble Company and global leader in GeoLogistics® and navigation software, today announced [CoPilot® RV, an offline navigation app](#) for drivers of large Recreational Vehicles (RVs) and motorhomes.

“We’ve taken a great deal of care to create a CoPilot GPS navigation app designed specifically for the unique navigation needs of RV and motorhome drivers,” said David Quin, VP consumer applications at ALK Technologies. “CoPilot RV is a powerful and affordable tool to navigate a RV or motorhome confidently throughout the U.S. and Canada, leaving users free to enjoy the drive without worrying about traveling on a restricted road or losing guidance in areas with spotty data coverage.”

The new app for smartphones and tablets enables users to take the strain out of driving a RV or motorhome by automatically generating customized routes based on vehicle size and class (height, weight and length).

Drivers can hit the road with confidence, knowing that CoPilot RV provides them with:

- Route planning that avoids narrow local roads and prevents dangerous or costly run-ins with low bridges and other restricted roads
- Clear, easy-to-follow directions designed to reduce driver distraction
- Easy access to millions of useful pre-installed locations like campgrounds, rest areas and gas stations
- Multi-stop itinerary builder with the ability to add up to 50 stops across the country, saving time and fuel costs
- Voice-guided turn instructions, automatic route recalculation, advanced lane guidance at highway exits and intersections plus speed limit warnings when posted speed is exceeded
- 12 months of real-time traffic service to help drivers avoid unexpected delays on routes
- Free map updates of the U.S. and Canada

CoPilot RV’s detailed and comprehensive street maps of the U.S. and Canada are downloaded directly to a smartphone or tablet for offline use, eliminating the need for a mobile data network connection in remote areas.

For a full list of features, visit: <https://copilotgps.com/us/rv-navigation/>.

CoPilot RV is available now through Google Play and the iTunes AppStore for a limited time introductory price of \$49.99.

About ALK Technologies

ALK Technologies, a Trimble Company and global leader in GeoLogistics solution and navigation software, is focused on developing innovative solutions for transportation, logistics, mobile workforces and consumers. Product lines include PC*MILER, CoPilot and ALK Maps. PC*MILER is widely recognized as a transportation industry standard for routing, mileage and mapping in North America. CoPilot is a leading source of GPS navigation software for fleets, mobile operators, hardware OEMs, system integrators, professional drivers and consumers. ALK Maps is a development platform designed for the transportation industry and provides commercial routing, geocoding and mapping visualization for enterprise applications.
