

World Patent Marketing Review Committee Approves The Child Seat Alarm System, A Child Safety Invention For Today's Busy Parents

World Patent Marketing Reviews A Child Safety Invention. Will The Child Seat Alarm System Be the Next World Patent Marketing Low Cost Success Story?

New York, NY ([PRWEB](#)) March 26, 2016 -- [World Patent Marketing](#), a vertically integrated manufacturer and engineer of patented products, announces the Child Seat Alarm System, a child safety invention that prevents children from being left alone and unattended inside a vehicle.

"The Durable Baby Goods Industry is worth \$5 billion," says Scott Cooper, CEO and Creative Director of World Patent Marketing. "This industry experienced increased sales over the past five years. The trend of celebrity babies have also given industry operators a chance to distinguish themselves with innovative products."

"Parents of young children are naturally wired to multi-task," says Jerry Shapiro, Director of Manufacturing and [World Patent Marketing Inventions](#). "Unfortunately, parents are human too and can accidentally leave their children inside a locked vehicle while attempting to accomplish so much chores and errands during the day. The Child Seat Alarm System is a child safety invention which allows parents to be always notified and aware of their children while driving, thus never leaving them behind once they get out of the vehicle."

The Child Seat Alarm System is a child safety invention designed to prevent children from being accidentally left inside a vehicle. It provides a weight-related sensor that is automatically activated once the child is placed and buckled on the child car seat. This sensor, when activated, indicates that a child is present in the vehicle. So when a parent or guardian accidentally heads out of the vehicle and has already walked a short distance, the device will automatically send an audible warning signal to remind them of the child at the back seat.

"Child safety inside a vehicle is optimized when it comes to the use of the Child Seat Alarm System," says inventor Crystal C. "This child safety invention is utterly important for every parent of a young child to have in a vehicle because it allows them to be constantly reminded of a child's presence while running around on errands or when going on road trips."

Julia Lee, a young mother of two from Detroit, MI, has this to say about the Child Seat Alarm System: "I am constantly driving from one location after another when it comes to accomplish errands for both work and home. With the Child Seat Alarm System, I can feel reassured that I never leave my kids inside the vehicle."

The Child Seat Alarm System is a child safety invention that prevents children from being left alone inside a vehicle.

ABOUT WORLD PATENT MARKETING

World Patent Marketing is an innovation incubator and manufacturer of patented products for inventors and entrepreneurs. The company is broken into eight operating divisions: Research, Patents, Prototyping, Manufacturing, Retail, Web & Apps, Social Media and Capital Ventures.

As a leader in patent invention services, World Patent Marketing is by your side every step of the way, utilizing

our capital and experience to protect, prepare, and manufacture your new product idea and get it out to the market.
