

## **Orlando Automotive Dealerships Receive Waste Management Solutions for New Construction from Sunshine Recycling**

*Orlando dumpster rental company, Sunshine Recycling, is providing waste management services during the construction of two new Don Mealey LLC Automotive dealerships.*

Orlando, Florida ([PRWEB](#)) May 16, 2016 -- [Orlando waste management company](#) Sunshine Recycling is currently servicing two Don Mealey Automotive LLC dealership construction projects in central Florida; both are LEED certified, meeting strict environmental sustainability standards. For the construction debris, Sunshine Recycling will provide 30-yard roll off dumpsters and hauling to local recycling centers and waste energy plants.

One of the construction projects will be a Mazda dealership and service center in Orlando, which will be built on a vacant lot along Orange Blossom Trail. This area is quickly becoming known as “auto row” due to the volume of automotive dealerships and retail establishments. The second development will be a 39,000 square-foot Chevrolet dealership in Clermont, Florida, which will cover eight acres with the capacity to store over 500 automobiles. [Schmid Construction](#) will utilize a tilt-up construction technique, allowing the buildings’ walls to be poured, dried and raised onsite. Large amounts of concrete scraps are expected to be generated during this project, and Sunshine Recycling will haul all waste to the appropriate facilities.

With over 15 years of waste management experience, Sunshine Recycling provides both commercial and residential clients throughout Orlando, Florida with customized waste solutions for projects of any size. LEED certified by the U.S. Green Building Council (USGBC), Sunshine Recycling tracks and reports all materials recycled for green building projects, such as the Don Mealey dealerships.

“These new dealerships will bring hundreds of construction jobs, permanent jobs and vendor opportunities to the area,” explains Chuck Herb, owner of Sunshine Recycling. “We’re proud and excited to be a part of this economic growth in our community.”

About Sunshine Recycling Inc.:
