

New Summit Racing Bust-N-Out™ Bolt Removal Tools Now Available

Summit Racing's Bust-N-Out Bolt Removal Tools are the proper way to remove broken bolts or studs from a part, saving the existing threaded hole and the part itself.

Tallmadge, OH ([PRWEB](#)) March 31, 2016 -- [Summit Racing's Bust-N-Out Bolt Removal Tools](#) are the proper way to remove broken bolts or studs from a part, saving the existing threaded hole and the part itself.

Designed to be used with a high-speed die grinder, the extraction system contains two end cut carbide burrs to prepare broken fasteners for final drilling through their centers with the included drill bit. This greatly increases the ability to drill the broken bolt on-center. The existing bolt hole provides a guide for correctly aligning the burrs to the bolt surface. That saves the existing threaded hole and the component—and no more crooked bolts or studs.

Summit Racing offers Bust-N-Out Bolt Removal Tool Kits for these fastener sizes:

- 1/4 inch and 6mm
- 5/16 inch and 8mm
- 3/8 inch and 10mm
- 7/16 inch and 12mm
- 1/2 inch and 14mm

Don't have a [high speed grinder](#)? Summit Racing also offers a nice selection of them.
