

## **InventHelp Inventor Designs Improved Hand Tool for Truckers (FRO-363)**

*InventHelp is working to submit this idea, the WK TOOL, to companies for their review and potential response.*

PITTSBURGH, PA ([PRWEB](#)) April 02, 2016 -- “I work as a truck driver,” said an inventor, from Ivanhoe, Calif., “and I thought there needed to be a more efficient way to test for flats, release the fifth-wheel lock and do some light hammering, so I invented the WK TOOL.”

The patent-pending WK TOOL provides a more effective way for truck drivers to test for flat tires, release the fifth-wheel lock and perform light hammering. In doing so, it eliminates the need to carry different tools. As a result, it saves time and space and it offers added convenience. The invention features a versatile design that is easy to use and store so it is ideal for truck drivers. Additionally, a prototype is available.

The inventor described the invention design. “My multi-function design enables a truck driver to easily complete a variety of jobs.”

The original design was submitted to the Fresno office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 14-FRO-363, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
