

InventHelp Inventor Develops Vehicle Detailing Aid (MOZ-241)

A Pittsburgh-based invention company, InventHelp is submitting the VACUUM SQUEEZER/VACUUM SLIDER to companies for their review.

PITTSBURGH, PA ([PRWEB](#)) April 05, 2016 -- "While cleaning the interior of my car, I realized that there were certain hard-to-reach areas that I simply could not access with a vacuum," said an inventor from Pensacola, Fla. "I came up with this idea to help me get into those tight, confined areas."

He developed the VACUUM SQUEEZER/VACUUM SLIDER to allow tight, cramped areas to be vacuumed out. This makes cleaning and detailing vehicles easier. It ensures that you can clean between the seats, spaces in the dashboard and other hard-to-access areas. This leads to a cleaner vehicle interior. Additionally, it is ideal for both professionals and do-it-yourselfers, and it is easy to use.

The original design was submitted to the Mobile office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 14-MOZ-241, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
