

## **InventHelp Inventors Develop Vehicle Safety System (POO-158)**

*InventHelp, a Pittsburgh-based inventor service company, is submitting the VEHICLE WARNING SYSTEM FOR CHILD LEFT IN CAR to companies for review.*

PITTSBURGH, PA ([PRWEB](#)) April 07, 2016 -- "We saw too many tragic news stories detailing the deaths of children who were left unattended in vehicles on hot days," said one of two inventors from Hillsboro, Ore. "We thought that there had to be a surefire way to prevent such unnecessary deaths, which led to our idea."

They developed the patent-pending VEHICLE WARNING SYSTEM FOR CHILD LEFT IN CAR to remind the driver to remove a child from the back seat when leaving the vehicle. The system keeps a child from being left in a vehicle unattended on a hot day, which is designed to reduce the risk of death from hyperthermia. It offers added peace of mind to parents and caregivers. The invention features automatic operation. Furthermore, it is adaptable for use with any new or existing vehicle.

The original design was submitted to the Portland office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 14-POO-158, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
