

InventHelp Inventor Develops Roadside Assistance Equipment (AVZ-1230)

InventHelp, a Pittsburgh-based inventor service company, is submitting the WEATHER CLAMPS to companies for their review.

PITTSBURGH, PA ([PRWEB](#)) April 13, 2016 -- InventHelp, a Pittsburgh-based inventor service company, is submitting the WEATHER CLAMPS to companies for their review.

"I have gotten stuck in the snow with no shovel, and it took me forever to get my car back on the road," said an inventor from Anchorage, Alaska. "I thought that there had to be an easier way to dislodge a tire from loose material like snow, sand and mud."

He developed the patent-pending WEATHER CLAMPS to provide a quick, easy way to get a stuck vehicle back on the road. The equipment ensures that there is sufficient grip to provide the wheel with traction. The kit eliminates the need to keep a shovel on hand. It is ideal for use on a variety of surfaces, such as snow, ice, sand, mud and other loose terrain. In addition, the invention saves time and effort, and offers added peace of mind. It also is usable on heavy equipment, trucks and semis, and it will be essential for ice-road truckers.

The original design was submitted to the National Sales Office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 15-AVZ-1230, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
