

InventHelp Inventor Develops Snow-Plow Security Device (BMA-4568)

One of America's largest invention submission companies, InventHelp is submitting the PLOW LOCK to companies for their consideration.

PITTSBURGH, PA ([PRWEB](#)) April 13, 2016 -- "I heard that detached snow plows were being stolen from dealerships," said an inventor from Franklin, Mass. "I thought that there should be a way to keep thieves from stealing these valuable pieces of equipment, which led me to develop this idea."

He created a prototype for the patent-pending PLOW LOCK to prevent a detached snow plow from being stolen. The accessory makes it impossible for a detached snow plow to be connected to a pickup truck. This enhances the security of a detached snow plow. Additionally, the unit provides added peace of mind and is designed for ease of use.

The original design was submitted to the Boston office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 15-BMA-4568, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
