

Inventor and InventHelp Client Develops Trucking Accessory for Safer Driving (BMA-4579)

A leading inventor service company, InventHelp is submitting the HOTT BOXX to companies for their consideration and possible feedback.

PITTSBURGH, PA ([PRWEB](#)) April 14, 2016 -- "It can be very difficult to see what is behind the trailer when backing up to a loading dock, especially if the driver is doing this at night or during the early morning hours," said an inventor from Hillsboro, N.H. "I came up with this idea to ensure that there is ample lighting available."

He developed the patent-pending HOTT BOXX to provide added illumination when reversing a trailer. The accessory ensures that the driver can see the area behind the trailer clearly, even in darkness or low-lighting conditions. This enables the driver to avoid hitting obstacles when reversing. The invention is designed to improve safety and offers added peace of mind. Furthermore, it avoids damages to the trailer.

The original design was submitted to the Boston office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 15-BMA-4579, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
