

## **Organize Shopping Bags in Vehicle Trunks With the CLOSET TRUNK - Designed by InventHelp Client (SDB-892)**

*InventHelp is attempting to submit the CLOSET TRUNK to appropriate companies for their review.*

PITTSBURGH, PA ([PRWEB](#)) April 23, 2016 -- Transporting full shopping bags in the trunks of vehicles often results in spilled items, items that are left behind after unloading and/or items that need to be rebagged. "I want to make transport of these bags safer and more convenient, and I want to reduce the use of plastic bags in favor of recyclable bags," said an inventor from Chula Vista, Calif.

The ergonomic CLOSET TRUNK provides a reliable way to stabilize and organize full recyclable shopping bags while transporting them in a vehicle's trunk. It prevents fallen and left-behind items, as well as eliminates the need to rebag items. It also cuts down on the use of plastic bags. The inventor has created a prototype of her idea.

The original design was submitted to the San Diego office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 15-SDB-892, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
