

Summit Racing Equipment Now Carries the Newest Performance Parts from Holley, Proform, and Heatshield Products

Summit Racing now carries Holley's new Sniper EFI Systems, Proform Black Series Carburetors, and Heatshield's I-M Shields for late model GM and Ford intake manifolds.

Tallmadge, OH ([PRWEB](#)) April 27, 2016 -- Summit Racing now carries Holley's new Sniper EFI Systems, Proform Black Series Carburetors, and Heatshield's I-M Shields for late model GM and Ford intake manifolds.

[Holley Sniper Series EFI Systems](#)

Owners of carbureted musclecars, street rods, and classic trucks can convert to Holley electronic fuel injection for under \$1,000. The new Holley Sniper EFI System is a bolt-on replacement for a carburetor on a single or dual quad intake manifold. The self-tuning system comes with a handheld color touchscreen loaded with Holley's Calibration Wizard. Just answer the Wizard's questions about the engine and the ECU creates a base map to get the engine running. From there, the system will self-tune as the vehicle is driven.

[Proform Black Series Carburetors](#)

Proform's new Black Series Carburetors are hand-assembled, mechanical secondary carburetors with Proform's Black Diamond® coating that looks classy and reduces fuel temperatures by 6% compared to non-coated carburetors. The carburetors also have a newly designed throttle lever with an integral Ford automatic transmission kickdown, GM 700-R4 TV cable mounting holes, and provisions for Chrysler kickdown and throttle cable brackets.

[Heatshield Products I-M Heat Shields](#)

It's true—installing a Heatshield Products I-M Heat Shield can add a nice hunk of horsepower and torque. SuperChevy.com installed an I-M Shield on the plastic intake manifold of a modified LS1 in a C5 Corvette. Not only did the shield drop intake temperatures by a whopping 43 degrees F, the Corvette picked up 18 peak horsepower and 20 lbs.-ft. of torque at the rear wheels.
