

InventHelp Inventor Develops Functional and Stylish Vehicle Accessory (WDH-944)

InventHelp, based in Pittsburgh, is submitting the WHEEL WELL COVER to companies for their consideration.

PITTSBURGH, PA ([PRWEB](#)) April 27, 2016 -- "The gap between the edge of the wheel well and the tire creates drag and looks unsightly," said an inventor from Washington, D.C. "In order to eliminate this gap and add a stylish touch to the vehicle, I came up with this idea."

He created a prototype for the WHEEL WELL COVER to conceal the ugly gap between the edge of the wheel well and the tire. This is intended to reduce the drag caused by this gap. It makes the vehicle more aerodynamic, which helps to improve fuel economy. Additionally, the set of accessories makes the vehicle look more stylish and appealing.

The original design was submitted to the Washington D.C. office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 15-WDH-944, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
