

Avoid Cell Phone-Related Driving Accidents With the MULLIGAN - Designed by InventHelp Client (HTM-151)

Pittsburgh-based InventHelp, founded in 1984, is submitting the MULLIGAN to companies for their review and possible feedback.

PITTSBURGH, PA ([PRWEB](#)) April 27, 2016 -- An inventor from Dallas, Pa., thinks that use of cell phones and driving can't be done simultaneously in a safe manner, so the best way to combat this widespread and dangerous problem is to remove the temptation to do so altogether.

In order to meet this need he designed the patent-pending MULLIGAN, a device that provides a way to reduce vehicle accidents. It deters use of a cell phone while driving. As a result, it avoids distraction, which allows for more attentive driving. Overall, it promotes safety and peace of mind. Reliable and easy to use, the device is compatible with all vehicles.

The original design was submitted to the Houston office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 15-HTM-151, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
