

World Patent Marketing Invention Team Announces Wonder Washer, A Cleaning Invention That Will Tackle Any Tough Grime And Bugs On Windshields

World Patent Marketing Reviews A New Cleaning Invention. Will Wonder Washer Be the Next World Patent Marketing Low Cost Success Story?

Miami, FL ([PRWEB](#)) May 12, 2016 -- [World Patent Marketing](#), a vertically integrated manufacturer and engineer of patented products, announces the Wonder Washer, a cleaning invention designed to remove even the toughest dirt, grime, and bugs from windshields of commercial vehicles with their own water tanks

"The car wash and auto detailing industry is worth \$9 billion," says Scott Cooper, CEO and Creative Director of World Patent Marketing. "The number of vehicles in use in the United States is projected to rise steadily over the next five years, further expanding the industry's customer base."

"A filthy windshield is not only disgusting to look at, it can also diminish a driver's visibility and potentially cause accidents on the road," says Jerry Shapiro, Director of Manufacturing and [World Patent Marketing Inventions](#). "With the Wonder Washer, windshields are now thoroughly cleaned through a brush application with a mechanical head.

The Wonder Washer is a pressure washer that has a storage compartment within a RV or other commercial vehicle containing own water tank or from the 2.5 gal reserve tank on a pressure washer unit. It is a cleaning invention that makes it easy to clean tough grime and bugs off of a windshield. Containing a water reserve, soap canister, mechanical head brush, and a remote control to regulate pressure, drivers can be on their way with an impeccable windshield. Simply pull to a stop and activate the pressure washer by plugging in the hose. It uses a mechanical head and water coming from the pressure washer to clean the windshield.

"The Wonder Washer is simple and easy to use," says inventor Tommy D. " You just pull over and get out of your motor home, and then activate the pressure washer by remote control to turn it on. The pressure washer is hooked with a brush and is used to clean the windshield. Once you attach the brush attachment, the water is pressurized through."

Practically versatile, the Wonder Washer can be used with commercial vehicles containing their own water tanks. Spend more time driving than cleaning with this new cleaning invention!

About World Patent Marketing

World Patent Marketing is an innovation incubator and manufacturer of patented products for inventors and entrepreneurs. The company is broken into eight operating divisions: Research, Patents, Prototyping, Manufacturing, Retail, Web & Apps, Social Media and Capital Ventures.

As a leader in patent invention services, World Patent Marketing is by your side every step of the way, utilizing our capital and experience to protect, prepare, and manufacture your new product idea and get it out to the market.
