

## GroundLink Reduces Hamptons Rates This Summer

*[GroundLink](#) Reduces Luxury Car Rates by 20%; Starting As Low \$45 Per Person*

New York, NY ([PRWEB](#)) May 18, 2016 -- With the summer season around the corner, [GroundLink](#), the New York-based, tech-enabled black car service, has announced new savings on its popular Hamptons Private Driver scheduled car service, which was launched last summer. Residents of New York or visitors arriving into the New York area airports (LaGuardia, Kennedy, Newark, Westchester and Teterboro) can easily pre-book fixed-priced, door-to-door transport to and from the Hamptons. One-way, per-person rates start as low as \$45 (based on six passengers riding in an SUV and booked via the company's mobile app). The service will be available throughout the summer via the company's award-winning [mobile app](#), at [www.groundlink.com/hamptons](http://www.groundlink.com/hamptons) or by calling the company's 24/7 reservations line at 1 -855-231-9684.

Hamptons Private Driver is competitively priced according to the vehicle category selected and the destination. Transport from New York City or the city's airports in a three-person luxury sedan to/from Southampton will be priced at \$229 (each way) and at \$249 (each way) to/from Montauk and East Hampton. The six-person, SUV-class vehicle is priced at \$299 (each way) to/from Southampton and \$329 (each way) to/from Montauk and East Hampton. Taxes and gratuity are additional, but are shown in the final price prior to booking. Unlike with on-demand services or other black car services, Hamptons Private Driver customers will never be subjected to surge prices or increased pricing during peak periods or in the event of traffic.

“We are pleased to offer even more competitive pricing on our popular Hamptons Private Driver service this summer season. The convenience of our scheduled Hamptons service combined with the privacy and added savings makes for a stress-free summer for those headed to the Hamptons,” said Liz Carisone, CEO of GroundLink.

By using GroundLink's user-friendly mobile app (promo code: HAMPTONS) customers are able to save an additional \$20 off luxury sedan prices and \$30 off SUV bookings. The app allows customers to easily select their pick up and drop off locations for Hamptons Private Driver using nearby airports, venues, addresses or their ride history. Customers can also track their car and driver from the time the driver is dispatched until they are dropped off at their destination, using the GroundLink mobile app or a link provided in SMS car location alerts sent to them.

Hamptons Private Driver provides a private alternative to coach or train service. With Hamptons Private Driver, riders can leave the driving to a fully-insured and professional driver, and busy executives can work en route and not have to endure the stress of driving in traffic. This service is also a scheduled alternative to on-demand, shared-economy providers.

### About GroundLink

GroundLink is a tech-enabled provider of executive black car service in major cities throughout the world. Offering the industry's only on-time guarantee, GroundLink focuses on duty of care, with professional drivers who are screened, properly licensed and fully insured.
