World Patent Marketing Invention Team Introduces The Motorcycle Sunscreen, An Automotive Invention That Offers Sun Protection To Motorcycle Riders

World Patent Marketing Reviews A New Automotive Invention. Will Motorcycle Sunscreen Be the Next World Patent Marketing Low Cost Success Story?

New York, NY (PRWEB) June 07, 2016 -- World Patent Marketing, a vertically integrated manufacturer and engineer of patented products, announces the Motorcycle Sunscreen, an automotive invention that helps protect added protection for motorcycle riders.

"The Motorcycle, Bike & Parts Manufacturing is a $6 billion industry," says Scott Cooper, CEO and Creative Director of World Patent Marketing. "The market has shifted from baby boomers to the younger generation. The future is looking up for this industry."

“Motorcycles are becoming an increasingly vehicle of choice to be able to wade through traffic and get to one’s destination on time,” says Jerry Shapiro, Director of Manufacturing and World Patent Marketing Inventions. “However, this leaves people exposed to the outdoor elements at all times, which can be uncomfortable and a potential safety risk. The Motorcycle Sunscreen is an automotive invention that helps protect motorcycle riders while providing other useful features while on the road.”

The Motorcycle Sunscreen is an automotive invention specially designed to add protection and safety features for motorcycle riders. It features an easy and convenient installation and detachment process for utter convenience. This invention provides shade and protection against the heat of the sun or the rain. But what is truly amazing about the Motorcycle Sunscreen is that it provides ample protection against the impact of Wind. Being out in the open while driving a motorcycle exposes a person to the wind. With this device, motorcycles are shielded from the effects of the wind’s impact, thus providing added safety.

“The Motorcycle Sunscreen offers added safety and comfort features to those who drive motorcycles,” says inventor Sonny F. “This automotive invention is easy to attach to a motorcycle and provides instant comfort and protection against various outdoor conditions. Motorcycle riders can now enjoy a cool ride without worrying about being exposed while out in the open road.”

Mark Curtis, a mechanic and motorcycle owner from Houston, TX, has this to say about the Motorcycle Sunscreen: “Being on a motorcycle while driving on open road is absolutely thrilling. However, during bad weather conditions, this type of transportation can be quite dangerous to take. With the creation of the Motorcycle Sunscreen, I can drive my motorcycle whenever and wherever I want without worrying about being exposed to the elements.”

The Motorcycle Sunscreen is an automotive invention that will help motorcycle riders gain protection against the outdoor elements while enjoying a relaxing and easy drive.

ABOUT WORLD PATENT MARKETING
