*Advancing its mission to lead the Heavy Duty Truck Industry Software Management market, Pluss Corporation today announced the release of several groundbreaking software products to enhance PTM (Part-time Manager). By utilizing groundbreaking technology, PLUSS Corporation has created a powerhouse of software for information technologies, customer service, and vendor relations.*

([PRWEB](#)) May 10, 2002 -- COLUMBIA FALLS, MT, USA -- 8 May, 2002 -- Advancing its mission to lead the Heavy Duty Truck Industry Software Management market, Pluss Corporation today announced the release of several groundbreaking software products to enhance PTM (Part-time Manager). By utilizing groundbreaking technology, PLUSS Corporation has created a powerhouse of software for information technologies, customer service, and vendor relations.

For the past 20 years, PLUSS Corporation and PTM (Part-time Manager) have been the leaders in Heavy Duty Industry Software development. Focusing on the needs of their customers, Pluss Corporation continues to improve their total shop management program.

PLUSS announced today a new line of software products that will revolutionize the heavy duty industry segment.

PLUSSNET - a secure VPN (Virtual Private Network) for PLUSS clients to share data, do research, and sell parts.

RS Module - innovative break-through in live transactional Electronic Data Interface (EDI)s geared toward the automotive industry; a secure Internet connection, view that your customer database is current, consolidate bookkeeping into one location, see and order an out of stock parts directly from your Point of Sale System, and have the PO print and bill at the other location for shipping.

The PLUSS Group is a service package that shares inventory data with other PLUSS clients in your area. Never again lose a sale because of an out of stock item.

SuperCharge Credit card transaction server; integrates into PTM and allows credit card acceptance directly from PTM. Verify account information instantly through an encrypted Internet connection, or send in batch transactions at the end of the day.

PTMCOMM - a communications package that allows a PTM user to FAX or e-mail work orders, invoices, purchase orders, or estimates directly out of PTM. There are several add-ons to PTMCOMM that include an off site backup service.

PTM and Pluss have also created several EDI solutions for various vendors in the market and are willing to develop an integrated ordering system to and major vendor. Our current EDI solutions include Hastings, Melling, Transnet, TRINET, Truck Pride. If you need a communications package to help bridge the gap between PTM and your vendors, give PLUSS a call today.

Pluss Corporation is not just a software distributor, but a developer that hears the needs of the customer and asks for their involvement, and works one-on-one to make the customers transition into the most powerful Management tool on the market a smooth one.

#### ABOUT PLUSS CORPORATION AND PTM SOFTWARE

Pluss Corporation is a privately held corporation, incorporated in the state of Montana. It was initially founded as a partner to PTM Inc., as a move to improve customer service for Part-Time Manager program users. In light of Pluss Corporation's immediate success with Business Services and the development of new Sales and Marketing ideas, PTM Inc., made the decision to focus strictly on software development and total computing solutions. With this decision, PTM Inc., opted to sell the entire products and services side of their company to Pluss Corporation. PTM Inc., as a separate entity, can now concentrate solely on developing and designing software products for current and future generations of Part-Time Manager program users!
