

World Patent Marketing Invention Team Releases PRO-gressor Specs, an Ingenious Invention That Makes It Easier to Operate Earth-Moving, Construction Machines

World Patent Marketing Reviews A New Automotive Invention. Will PRO-gressor Specs Be the Next World Patent Marketing Low Cost Success Story?

Miami, FL ([PRWEB](#)) July 11, 2016 -- World Patent Marketing, a vertically integrated manufacturer and engineer of patented products, announces the PRO-gressor Specs, an automotive invention specially designed to provide a better view of earth-moving machines and vehicles.

"The Construction Machinery industry in the U.S. is worth \$37 billion," says Scott Cooper, CEO and Creative Director of World Patent Marketing. "Improved economic conditions are expected to bode well for manufacturers, as construction companies demand more equipment and accessories."

"Constructions, particularly those in a larger scale, would often need large machinery to aid in their building tasks," says Jerry Shapiro, Director of Manufacturing and World Patent Marketing Inventions. "Unfortunately, some of these types of machinery are large in size and can be quite difficult to operate. With this practical automotive invention called the PRO-gressor Specs, this will no longer be a problem."

The PRO-gressor Specs is an automotive invention designed for larger construction vehicles such as a motor grader or bulldozer. Made of durable metal, it is designed with a front frame that further has a bracket with two extended arms. One end of the arm is fitted with vehicle headlights. A reflector assembly is fitted onto the same brackets. This reflector allows the driver or operator of the vehicle to clearly see the front portion of earth-moving machines or vehicles, thus making their tasks safer and more efficient.

"The clear, projection of the Pro-gressor is an eye of profession for the perfect view, in accomplishing production, safety and takes a machine with a normal operator to the next level, just because its affordable and simple," says inventor Herman E.

Harold Reynolds, a construction worker from Arizona, has this to say about the PRO-gressor Specs: "Being in the construction business, I am well experienced in operating bulldozers. However, while I have experience and knowledge in handling this type of machine, it can still be a real challenge to clearly see the front portion of the machine. With this highly efficient invention called the PRO-gressor Specs, I am now able to make sure that my job is always on point and I do not accidentally put my work colleagues at harms way."

The PRO-gressor Specs is an ideal automotive invention which will provide efficiency and safety features for earth-moving machines and vehicles.

ABOUT WORLD PATENT MARKETING

[World Patent Marketing](#) is an innovation incubator and manufacturer of patented products for inventors and entrepreneurs. The company is broken into eight operating divisions: Research, Patents, Prototyping, Manufacturing, Retail, Web & Apps, Social Media and Capital Ventures.

As a leader in patent invention services, [World Patent Marketing](#) is by your side every step of the way, utilizing

our capital and experience to protect, prepare, and manufacture your new product idea and get it out to the market. Get a patent with World Patent Marketing and the company will send representatives to trade shows every month in order to further advocate for its clients. It is just part of the world patent marketing cost of doing business.
